ABSTRACT

Introduction: HEF or Aura is our spiritual signature. Traditionally, energy-field or aura is a protective psychic and spiritual energy field that surrounds the physical body. Energy from an aura is usually not static. It is constantly flowing, flashing, vibrating, expanding, and decreasing. Biopulsar-Reflexograph is a modern day instrument used as a human energy-field (Aura) measuring device, based on the latest computer technology combined with the scientific basis of the biofeedback, reflex-zone and energy meridian teachings and with ancient healing sciences.

Methodology: The biofeedback system Biopulsar-Reflexograph is a highly sensitive, biomedical measuring device, certified according to the European Guidelines for Medical Devices CE Class IIa. It is based on the latest computer technology combined with ancient healing sciences. The biofeedback sensor is a receiver for high-resolution, biomedical signals, which are taken from the reflex zones of the hand’s palm. For this particular study, we have compared general cases between the age group 20-80 years block as compare to pre-diagnosed cases of Dr. Uday Kumar Jejurikar. All these cases have been categorized into 10 divisions and 10 different organs are taken into consideration for the assessment of confirmation in gastro-intestinal system. The study gives the confirmation on the cases prescribed by doctor.

Conclusion: It was found that the aura diagnosis machine helped a lot in confirmed diseased cases and its symptoms diagnosis for GIT cases. The technology played major role in our research and helped in the validation of our age old traditional knowledge.

Key word: HEF, Aura, Gastro-intestinal System, Reflex Zones, Biofeedback, energy meridians, Biopulsar-Reflexograph.

INTRODUCTION

The aura is the multidimensional, invisible soul radiation of a person and consists of different vibrations. The physical body does not radiate the aura as commonly supposed, but the aura contains the physical body. The physical body is nothing else than condensed vibrations, which cannot be seen with the normal eye. Biopulsar-Reflexograph is a highly sensitive, biomedical measuring device, offers dynamical biofeedback of 43 organ reflex zones of the hand and support a clear and detailed syndrome diagnosis. The Biopulsar-Reflexograph not only expands your energy analysis capabilities, allowing you to identify a wider range of existing and potential conditions, which helps to improve patient's communication, comprehension and case acceptance.

The word ‘biofeedback’ is an indication for biomedical control mechanisms. It is composed by the Greek word bio = life, life processes and by the English word feedback = reaction. Reflex zones are areas on the skin surfaces, which have connections to the internal organs and body structures. For over thousands of years, Western and Eastern cultures have applied the knowledge of reflex zones in diagnoses and therapy. Indian and Chinese holistic healing sciences assume that the hand reflex zones are not only connected to the organs but also to the consciousness, the energy meridians, the energetic field (Aura) and the chakras of a person. The interpretation of the energetic situation of a reflex zone serves for diagnosis and therapy of the regulating state of the internal organs and the psyche.

METHODOLOGY

Study Area – Patidar Hospital and Research Centre, Ujjain. Before conducting the study, permission was taken from Institutional Ethical Committee.

Study Population - We have totally observed 212 cases for this particular study and these cases are
compared with total 100 control cases, including both sexes, belonging to different caste, culture and occupation within age range of 20 – 80 years.

**Study Tool - Biopulsar-Reflexograph**

The Biopulsar-Reflexograph uses only low frequency currents for the measuring of the skin resistance. During the measuring, the body cannot be inflicted with any harmful or disturbing impulses. Each of the 48 biomedical sensor pegs is an interface, conducting the measured biofeedback parameters of each individual organ zone to the PC every 500 milliseconds (synaptic real-time measuring). Then the data is processed and presented by the software as biofeedback graphs, aura colors of the organs, dynamical chakra activity and more.

A complex measuring of the whole body lasts about 1 minute. The patient does not have to undress. As the therapist does not touch the patient, no outside energies can influence the measuring of the patient’s energy field. In a very short period of time, the therapist receives a clearly arranged individual syndrome diagnosis of the entire organic network of the body. Through the organ biofeedback and the dynamic aura of the whole body, the therapist can get precise information concerning vitality as well as physical and psychological constitutions.

**Common Energy Patterns of the Biofeedback Graphs**

**Biofeedback amplitude ranges along the green harmony line:**

Harmony, pleasant lightness, homeostasis, balanced organ function. Ideal organ energetics.  
Ayurveda: Tridosha balance = Vata – Pitta – Kapha in harmony

**Biofeedback graph drops precipitously into the grey region:**

Cannot maintain energy and expends it quickly. Rapid exhaustion due to chronic weakness, particularly if stressed. Emptiness – inflammation. Is open, unprotected, and vulnerable. Tendency towards energetic emptiness = organ coma, even shock!
General readings are selected randomly from the common public, then compared and analyzed with the pre-diagnosed cases of doctor. In general cases, balanced state is more as compared to cases of diseased recordings.

**RESULTS**

Here, we are analyzing organs of GIT system, such as, esophagus, stomach, small intestine, colon and rectum. In our study, categorization is done on the basis of primary complaints that the patient is coming up with to the doctor, which is compared with the other main organs of GIT system.
The criteria for selection are as follows – For our study, doctor used to note his observation about cases, on the basis of his pre-diagnosed GIT cases, and then suggested the cases for aura diagnosis. They were categorized on the basis of the organ diagnosed by doctor. He did the assessment every 15 days and on the basis of his observations, cross-confirmed his diagnosis with aura observations given by Biopulsar-Reflexograph. On the basis of Dr. Uday Kumar Jejurikar’s findings, he has given following conclusions.

“Firstly, it is observed that beyond 50 yrs, one infected organ affects multiple organs, so this gives us a theory of multi-organ involvement i.e. whenever patient complaints of any specific symptoms involved with certain organ, we should also look for other organs for causes and their condition.

Secondly, high level of imbalance in pancreas again gives us a very important study because this organ is hidden behind the intestine, the posterior peritoneum. Normally, we are not able to look into the diseased condition of this organ except in such a graphic presentation where we are able to assess pancreas by different tools and different methods.

Thirdly, the data seems to be extremely useful as it proves beyond doubt that extremely diseased cases of stomach and colon can be easily picked up by Biopulsar graphical presentation. This was the most important observation in the present study. This is very rewarding for all of us that even if the patient is complaining of the any specific organ, you can look and compare the condition of other organs also.”

CONCLUSION

Biopulsar-Reflexograph can be used as a disease diagnosis tool with an additional advantage that it shows energetic organ changes long before a disharmony shows itself on the physical level. Therefore, it can be used for the prevention of illness as well.

In a nutshell, this health management tool is of great help in getting a preview of possible and probable health conditions, before your body experiences them in a physical way. The Aura scan machine also gives you a quick snapshot of your individual chakras, your general aura and the vitality level of various organs in the body.
